

Our Supervision Series Trailers and Minis are “State of the Art” for ease of use and functionality. These Mobile units can be monitored by our EPS owned Central Monitoring Station (CMS) in Tyler, Texas.

These easy to deploy trailers offer real time Theft protection during your site's most vulnerable hours. Rugged, tamper-resistant and compact their usefulness doesn't end at preventing crimes.

They can be used to reveal wasted time, potential liability issues, and employee theft; or use to simply view oil/gas sites, construction sites, sporting events, or any other temporary site that requires On/Off site Viewing. The WiFi feature allows multiple users to view the cameras at the same time. All of these features help you Increase business Productivity and \$Profitability!

## Supervision Standard Features

- Remote control of pan-tilt-zoom cameras
- Personal web site set up for remote communications via your computer
- On an internal network, multi-level password protection limits access to authorized personnel
- PPTP or L2TP and SSTP VPN for penetrating firewalls without opening ports
- 1 week of Offsite video storage
- Intuitive controls can be operated by people who are not computer savvy
- Set up camera presets and automated “touring”
- Monitor SV system health in real time, chart numerous variables including voltages, temperatures, hard drive function and more
- Trailer power loss Watchdog- when 110V power is lost, CMS is notified
- Reliable Internet access to Trailer from Windows Computers, iPhone® or Androids®
- Reliable Intranet Wifi access to Trailer from Windows Computers, iPhone® or Androids® 3g Internet connection for deployment on the Sprint Network
- 32 GB SSD for OS and 1 TB removable for Video
- Hybrid Solution integrating analog videos and IP cameras
- Codecs: H264 Internet, MPEG4 Local Wifi network
- Intrusion Alarm
- Enhanced Object Counting
- Advanced Motion Detection
- Video Stabilization
- 500 GB of video storage @ 176x82 resolutions (complies with 3g bandwidth limitations)
- Separate compartments, Service/ Customer for system operation
- Plug and Play deployment
- Connects to EPS Central Monitoring Station when turned on
- Advanced 3g Bandwidth monitoring
- Client notification of onsite events, with detailed reports and pictures. Viewable on EPS EyeEvents Forum†

## Supervision Mobile Surveillance™ Trailers

### By Eyecon Protection Solutions LLC

#### Reliable Wifi Networking

Wide Area Network Internet Backbone	Local Wifi for onsite Internet
Capable of high-speed, carrier-class links WPA2-AES encryption Next-Gen 2x2 Dual Polarity MIMO Omni Antenna Breakthrough speed (150+Mbps real TCP/IP) Outdoor PtP bridging and PTMP base-station applications. 802.11N MIMO 2.4 Ghz AP 31 mile range in ideal environment Hi-Performance Wireless Approvals: FCC Part 15.247, IC RS210 RoHS Compliance	Linear 2X2 MIMO radios with enhanced performance. +/- 15kV radio frequency Ethernet electrostatic discharge (ESD) protection. Up to 1000mW of output power Breakthrough speed 150+ Mbps real TCP/IP throughput. PtP bridging and PtMP base-station applications. 440 yard range in ideal environment Hi-Performance Wireless Approvals: FCC Part 15.247, IC RS210 RoHS Compliance

#### Standard Equipment

- 2- Infrared long range 620 TVL PTZ cameras with 350 feet viewable in complete darkness
- 2- 650TVL Infrared Bullet cameras with 150 feet viewable in complete darkness
- 2- 30 foot Omni directional motion detectors linked to both PTZ's to protect trailer from unauthorized access
- 32 Channel Hybrid DVR for High Quality Onsite monitoring and recording which includes
- 28 Channels IP based NVR for Supervision Mini connections
- 4 Channel Web Server @ 176x82 resolutions (complies with 3g bandwidth limitations)
- Smart thermometer with automatic fan control for high internal temperatures of 140° or higher
- IP Watchdog - if system fails to connect to CMS, modem resets and tries again until connected
- 1-15 watt Horn for Broadcasting Live or Recorded Warnings
- 1-110dB Siren and strobe lights
- 48 Hour Battery Backup of fundamental components and cameras

#### Supervision Trailer Options

- SmarterBeam – up to 500' 1 way motion detection perimeter
- License plate capture camera
- Thermal Camera
- GPS theft prevention
- Blinding lights

#### Advanced Reliable Networking

14 Supervision Minis can be connected wirelessly to one Supervision Trailer for large properties. Unit can be connected to onsite High speed internet Wifi connections for full streaming Wifi Internet access from trailer for onsite management during business hours
